ELITE SHEEP DRY FEED LICK

Elite Sheep Dry Feed Lick is a weather resistant loose lick supplement, balanced in vitamins and minerals, specifically formulated to support the health and performance of growing lambs, ewes and rams grazing low quality dry feeds and stubbles.

Elite Sheep Dry Feed Lick contains a blend of protein meals and non-protein nitrogen (NPN) sources to promote fibre digestion in the rumen, improving the utilisation of low-quality dry feeds.

- Is a source of macro minerals including calcium, phosphorus, magnesium, sulfur and sodium;
- Is a source of vitamins, including A, D, E & B1 and trace minerals including zinc, manganese, cobalt, selenium, iodine to support animal health. No copper is added to **Elite Sheep Dry Feed lick**;
- Should be offered on an ad-lib basis, with initial introduction occurring before feed quality declines, or sheep start losing weight.

Elite Sheep Dry Feed Lick should be offered to animals on an ad-lib basis. Offer in containers with suitable drainage to prevent water retention. Average intakes will be 20 to 30 grams/head/day – initial intakes may be higher before reducing to the desired rate after 10 to 14 days. If intakes remain high, please speak with your NFS Nutritional Consultant.

Livestock should be introduced to **Elite Sheep Dry Feed Lick** gradually as this product contains Urea and may be toxic at excessive levels. **Elite Sheep Dry Feed Lick** is NOT a complete feed - DO NOT offer if forage and fibre availability is limiting. Speak with your NFS Nutrition Consultant for additional information.

Typical Analysis (per Kg, As-Fed Basis)

VIT A	IU	360,000
