ELITE MAXILAC DMF 150

As production expectations of dairy herds increase, producers must recognise the increased requirements for vitamins & minerals to support production & reduce the risk of metabolic disorders. Elite Maxilac 150 is a sound solution to ensure these requirements are met throughout the lactation.

- Calcium, Magnesium and Phosphorus requirements are supplied in the form of MGP+, Magnesium Phosphate differentiating it from competing products, significantly increasing both the solubility and availability of these minerals to cattle.
- Trace minerals Copper, Cobalt, Chromium, Iodine, Manganese, Selenium, including organic Zinc, Vitamins A, D & E to promote metabolic health and boost immune function.
- Biotin improves hoof health, energy metabolism further supporting high yielding cows.
- Performance DFM concentrate (Direct Fed Microbials) are included at 10g per dose. DFM has been shown to increase immune activity, stimulate the growth of beneficial gut micro-organisms and inhibit pathogenic micro-organisms. DFM is made up of bovine specific bacteria, live yeast culture and digestive enzymes to promote the fermentation and digestion of both starch and fibre.
- Acid Buff is included to maintain a stable rumen pH for optimum function, reducing the risk of acidosis.

Elite Maxilac DMF 150 is palatable and easy to use. It should be included in the dairy mix or in the Total Mixed Ration at 150g per cow per day.
