ELITE HEIFER MACRO 60

The future success in a dairy business relies heavily on having a constant supply of fertile well grown replacement heifers. To achieve this goal nutrition is arguably as important as superior genetics! Well grown heifers produce more milk in their first and subsequent lactations, compete better with mature cows in the milking herd and have improved longevity over poorly grown heifers.

Heifer liveweights at mating and calving have a big impact on overall herd reproductive performance. Heifers reared to achieve mating and calving liveweight, & height for age targets are more likely to cycle, conceive, calve without delay, milk well as first calvers and succeed at getting in calf early.

Heifer Targets:

- 9mths of age reach 30% of mature weight
- 13-15mths of age join heifers (@ 50-55% of mature weight)
- 2 years (24mths) 1st calf at 90% of mature weight.

Elite Heifer Macro 60 has been formulated to supply:

- Additional calcium for skeletal development.
- Trace minerals essential for growth, health and production.
- Vitamin's, A, D & E.
- Acid Buff® to reduce risk of acidosis associated with grain feeding.
- Monensin to enhance feed:gain and bloat control.

Elite Heifer Macro 60 should be included at the rate of 60g/head/day (depending on Grain Feeding Rate).

This product is designed to be used as part of a nutritionally balanced diet.

- Grain based diets should always be introduced gradually to give the rumen time to adjust.
- A plentiful supply of a good quality (palatable) roughage source should be on offer as the grain mix is introduced along with pasture.
- Care must be taken when using self-feeders to avoid over consumption of grain to prevent sub-clinical and possible clinical acidosis which can result in stock mortality.
- Self-feeders should be checked on a regular basis for door clearances and fill capacity to assess consumption rates of stock to aid management decisions.

Typical Analysis each 60g dose contains

[U/RATE]	G/H/D	---	MONENSIN	MG	100.0
VIT A	IU	13000	ACID BUFF	G	33.0
VIT D3	IU	2250	CALCIUM	G	10.0
VIT E	MG	50	MAGNESIUM	G	4.0
COBALT	MG	3.0	PHOSPHORUS	G	1.5
COPPER	MG	80.0	SALT	G	12.0
IODINE	MG	3.0			
MANGANESE	MG	100.0			
SELENIUM	MG	1.80			
ZINC	MG	250.0
