ELITE MAXILAC 150

As production expectations of dairy herds increase, producers must recognise the increased requirements for vitamins & minerals to support production & reduce the risk of metabolic disorders. Elite Maxilac 150 is a sound solution to ensure these requirements are met throughout the lactation.

- Calcium, Magnesium and Phosphorus requirements are supplied in the form of MGP+, Magnesium Phosphate differentiating it from competing products, significantly increasing both the solubility and availability of these minerals to cattle.
- Trace minerals Copper, Cobalt, Chromium, Iodine, Manganese, Selenium, Zinc & Vitamins A, D & E to promote metabolic health and boost immune function.
- Biotin improves hoof health, energy metabolism further supporting high yielding cows.
- Monensin is included to increase feed conversion efficiencies, which is particularly important as production levels increase.
- Acid Buff is included to maintain a stable rumen pH for optimum function, reducing the risk of acidosis.

Elite Maxilac 150 is palatable and easy to use product. It should be included in the dairy mix or in the Total Mixed Ration at 150g per cow per day.

[U/RATE]	G/H/D	10.00	[U/RATE]	G/H/D	10.00
VIT A	IU	30000	MONENSIN	MG	225
