# ELITE ULTRA LAYER PREMIX

Elite Ultra Layer Premix is a high-quality product providing a balanced formulation of vitamins and trace minerals for commercial laying hens. This product is designed to support a high rate of lay, excellent egg shell quality and enhanced immunity for improved flock liveability and longevity.

It includes a high plane of vitamin nutrition (including Hy-D and Vitamin C) and enhanced trace mineral absorption via inclusion of key organic minerals (Cu, Fe, Mn, Se, Zn) to best support the hen, especially at times of stress (e.g. heat) and disease challenge. All National Feed Solutions premixes are manufactured using high quality products to maximise long term stability and potency.

## DIRECTIONS:

In laying hen diets thoroughly mix 1.5kg of Elite Ultra Layer Premix to each 1000 kg of mixed feed.

To maximise dispersion in the mix, it is recommended to pre-blend the premix addition with 5.0kg of a cereal carrier before adding to the mixer.

**ADDITION RATE:** 1.5 KG KG PER TONNE

**TARGET AGE:** AT TRANSFER OF THE FLOCK TO THE LAYER HOUSE AND THROUGHOUT LAY.

**PACK SIZE:** 20 kg

## NUTRITIONAL ANALYSIS:

When used as directed this premix will supply

VIT A	MIU	11	IRON ORG	GM	20
VIT D3	MIU	3	IODINE	GM	1
Hy-D	MGM	69	T MANGANESE	GM	60
